EYE PROTECTION

Models: AV13021 / AV13022 /AV13024 This pair of protective eyewear meets EN166-2001 standard for Personal Eye protection.

USING THIS EYEWEAR

Always check with your supervisor or safety officer to confirm that the protection offered by this pair of eyewear is adequate for your work environment.

This eyewear offers protection against high speed particles low energy impacts.

They are Class 1 optical and can be worn all day in a normal working environment.

A copy of this product's Declaration of Conformance shall accompany this User Instructions.

WARNING

- This pair of eyewear offer no protection against IR radiation and thus should not be used as primary protection in environments where dangerous levels of IR radiation are present, for example where welding operations are carried out or the casting of molten metal.
- > This pair of eyewear should only be used at room temperature.
- This pair of eyewear provides no protection against UV radiation.
- Check the eyewear regularly for noticeable scratching, pitting or any other damage to the lens. Scratching, pitting or other damage to the lens can seriously reduce the level of impact protection provided by the product. Such product should immediately be discarded and replaced.
- No parts on this eyewear are replaceable or interchangeable. If any part of the eyewear is deemed unfit for use then the whole product should be discarded.
- If protection against high speed particles at extremes of temperature is required then the selected eye protector should be marked with the letter T immediately after the impact letter, i.e. FT, BT or AT. If the impact letter is not followed by the letter T then the eye protector shall only be used against high speed particles at room temperature.

PRODUCT MARKING.

The product has marking on temple which represents the performance of the product and suitable field of use:

GENERAL INSTRUCTIONS:

- > This product is not supplied with any accessories.
- It is advised that you keep this eyewear in a protective bag or box when not in use.
- Maximum product life is 2 years.It is advised that this eyewear
- should not be worn over prescription frames, as there is the possibility that impact may be transmitted to the prescription frame and thus create a hazard for wearer
- Whereas the material used in the constructing of this product has been deemed hypo-allergic it is still possible there may be some allergic reaction experienced by susceptible people. The user should check for any such reaction and cease use of product if any reaction is observed.

STORAGE

Eyewear should be stored at temperatures above 5C and below 40C, rH 90% and kept away from solvents, solvent vapors or any corrosive materials, as these may seriously reduce the impact protection provided by the eyewear.

CLEANING

This eyewear can be cleaned with soap and warm water, or if required, disinfected with a UV lamp or cleaned with a common domestic disinfectant. Whereas the lens are hardcoated to provide a certain level of scratch resistance, they are not scratch proof and it is recommended that wiping of the lens be kept to a minimum and only done so with a soft, non abrasive cloth.
